

## Courtroom Listening Assistance Devices

This is the device with the earpiece connected. The earpiece sits on the ear. It does not go inside the ear like an earbud.

When turned on, the power button on the top lights up as it comes on but does not stay lit up.

The main panel on the front of the device controls volume with the up and down arrow buttons.

On the back of the device is a clip that can be clipped to the user's garment if desired.
